

ARCHITECTING YOUR PATH TO \$100,000

THE DEFINITIVE PLAYBOOK FOR
ATM BONUS RANK ADVANCEMENT

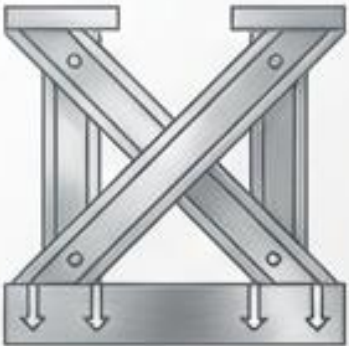

STRATEGIC RANK ADVANCEMENT METRICS			
RANK TIER	REQUIRED VOLUME	CONVERSION MULTIPLIER	ESTIMATED BONUS
PLATINUM	35%	20%	\$10,000+
GOLD	20%	10%	\$10,000+
SILVER	10%	10%	\$5,000+
BRONZE	5%	5%	\$1,000+

STRATEGIC RANK ADVANCEMENT METRICS			
RANK TIER	REQUIRED VOLUME	CONVERSION MULTIPLIER	ESTIMATED BONUS
	R	V	
PLATINUM	35%	20%	\$10,000+
GOLD	20%	10%	\$10,000+
SILVER	10%	10%	\$10,000+
BRONZE	10%	5%	\$10,000+

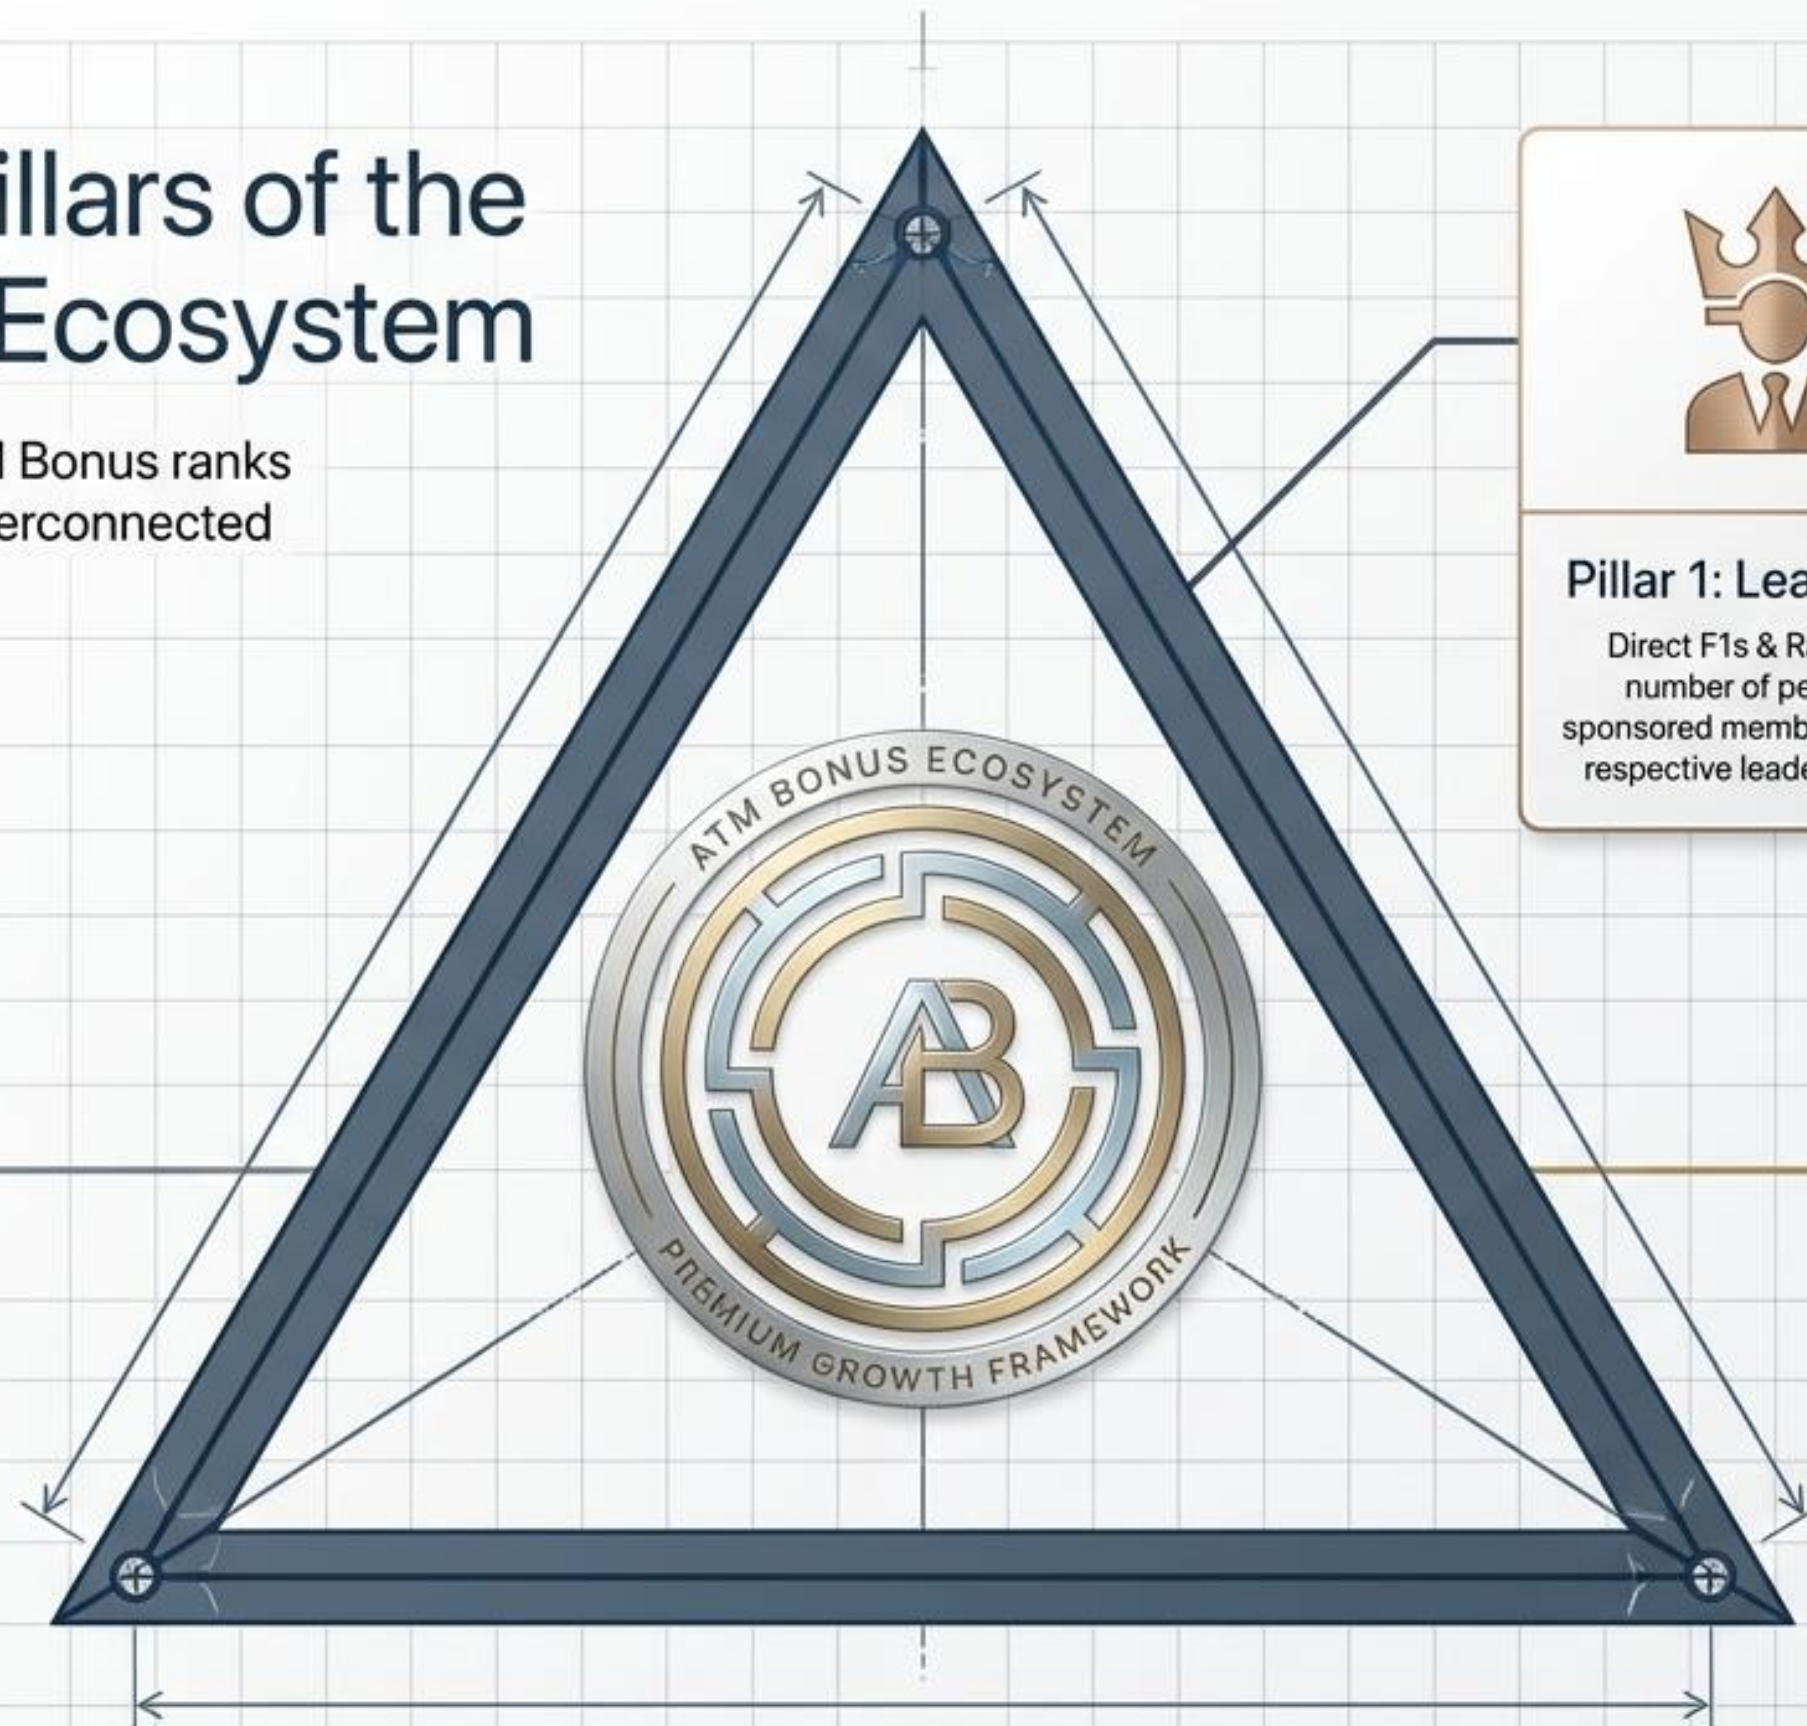

The Three Pillars of the ATM Bonus Ecosystem

Advancing through the ATM Bonus ranks requires mastering three interconnected metrics of growth.

Pillar 2: Architecture

Leg Strength. The structural integrity of your organization, measured by independent branches and embedded leaders.

Pillar 1: Leadership

Direct F1s & Ranks. The number of personally sponsored members and their respective leadership tiers.

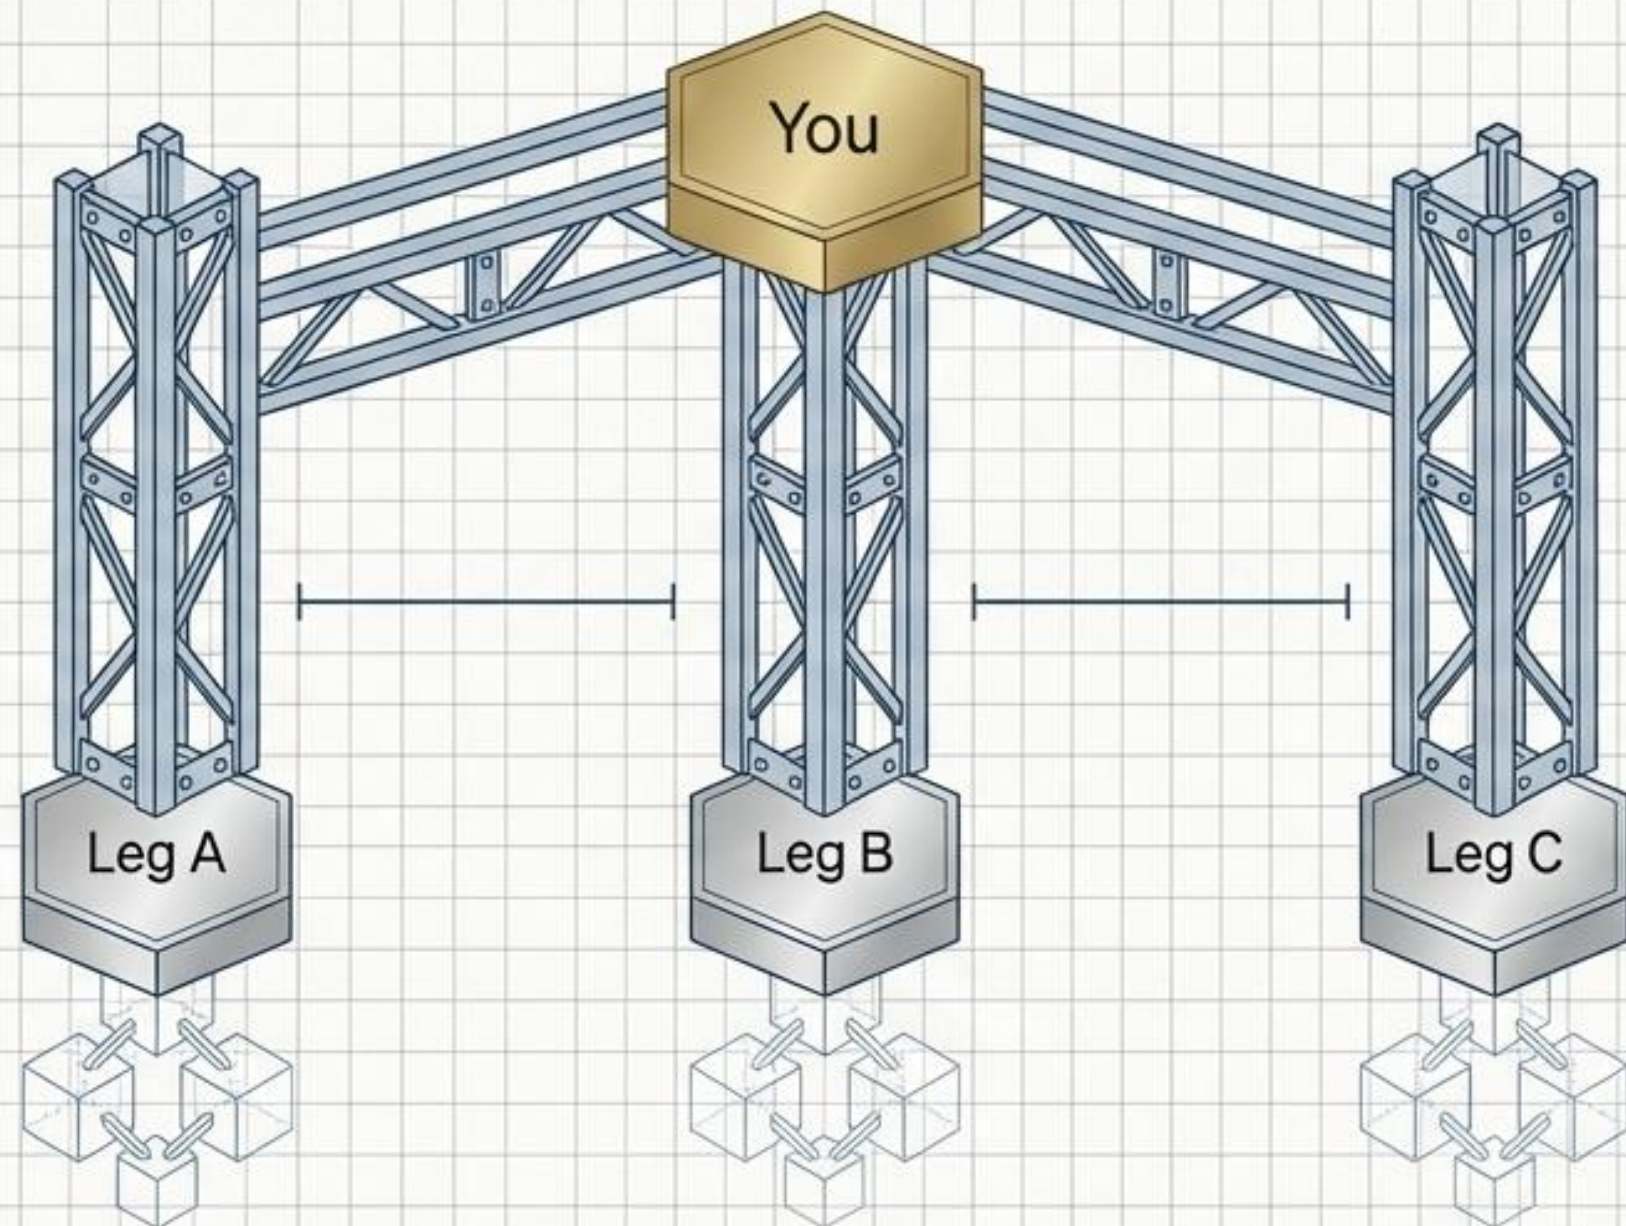

Pillar 3: Fuel

Qualifying Volume. The total economic activity generated by your network across ecosystem platforms.

Defining the Structural Unit: F1s and Legs

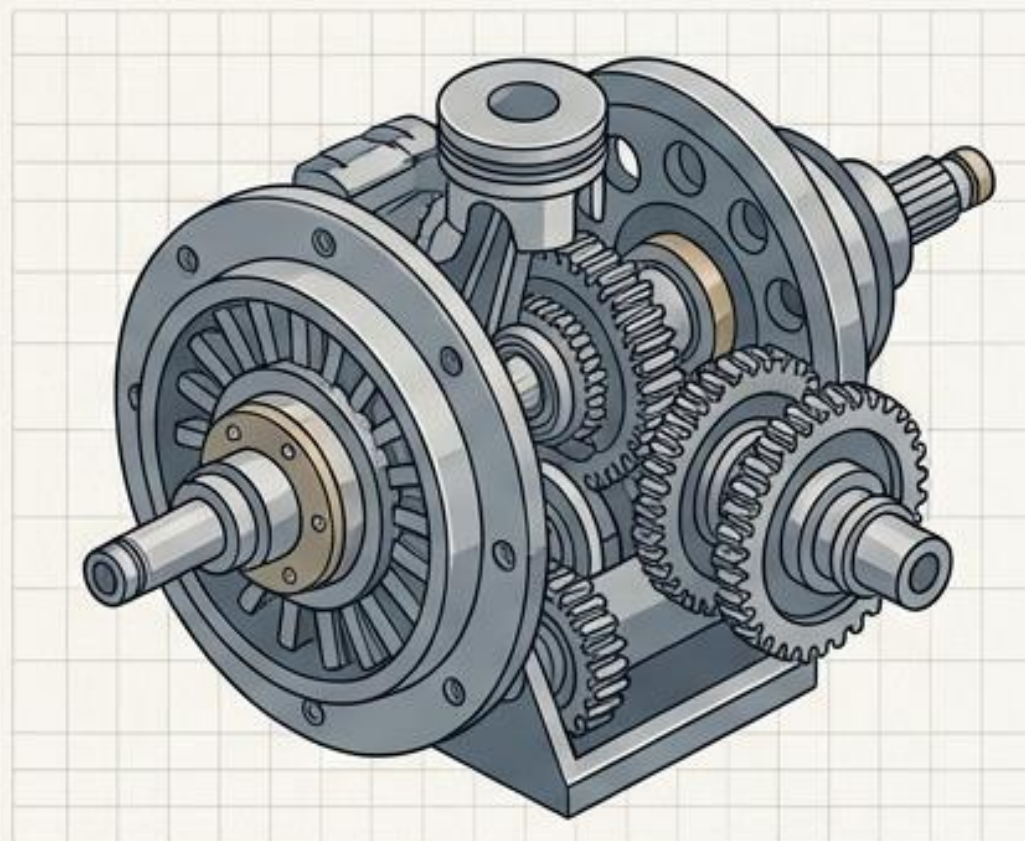

An F1 (Direct) is a participant personally sponsored or enrolled by you.

The Golden Rule: Every direct F1 constitutes one separate Leg in your organization.

Key Takeaway: If you personally sponsor 3 F1s, you have engineered a 3-Leg organization.

The Dual Metrics of Volume

PV (Personal Volume)

Function:
The Personal Engine

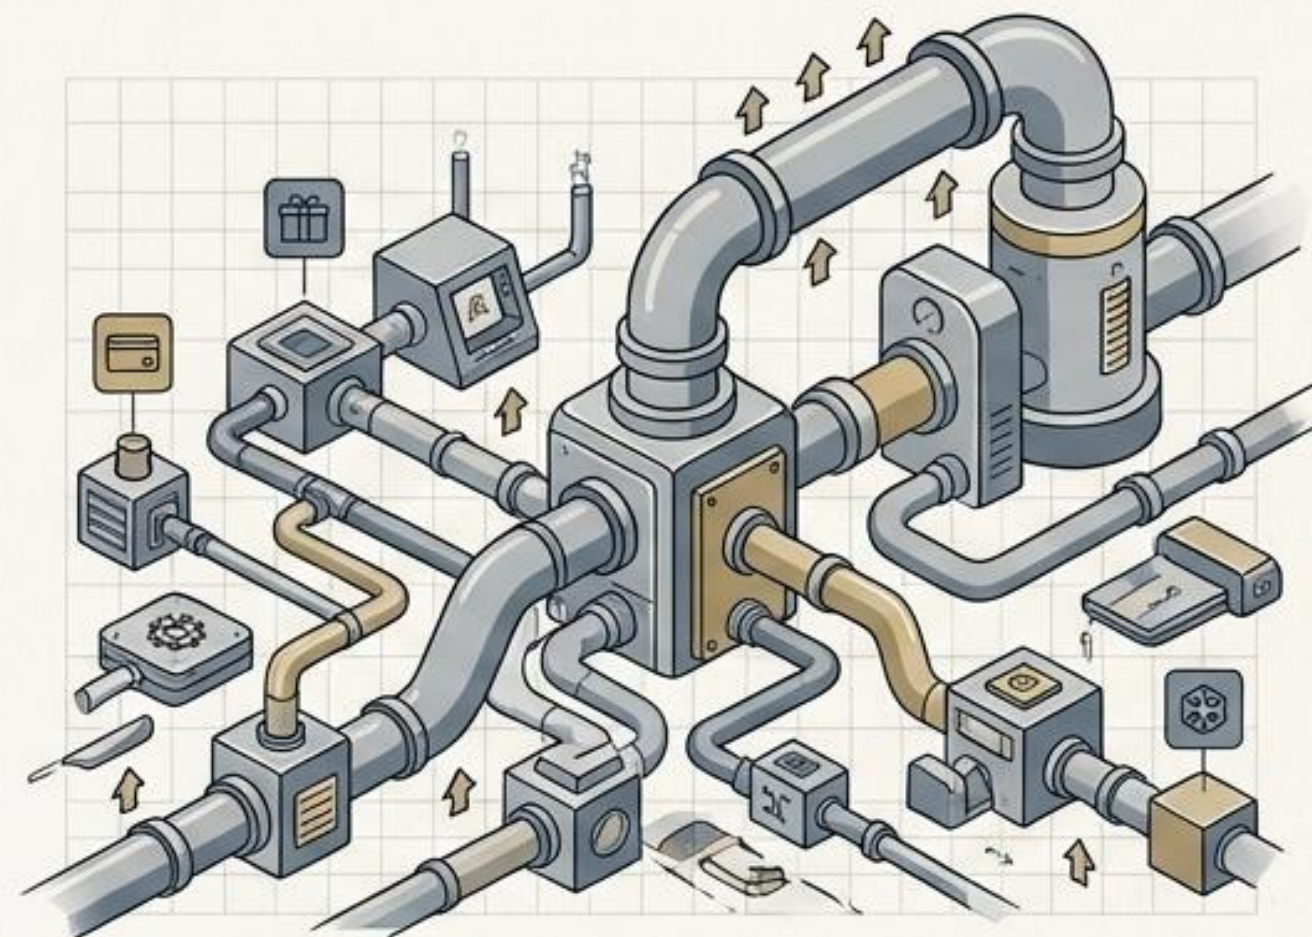

Reflects your direct, personal activity level.

Definition:

The cumulative, qualifying volume generated by your entire organization used to trigger rank advancement.

Requirement:

Serves as a monthly maintenance condition for advanced ranks.

QV (Qualifying Volume)

Function:
The Promotion Fuel

The cumulative, qualifying volume generated by your entire organization used to trigger rank advancement.

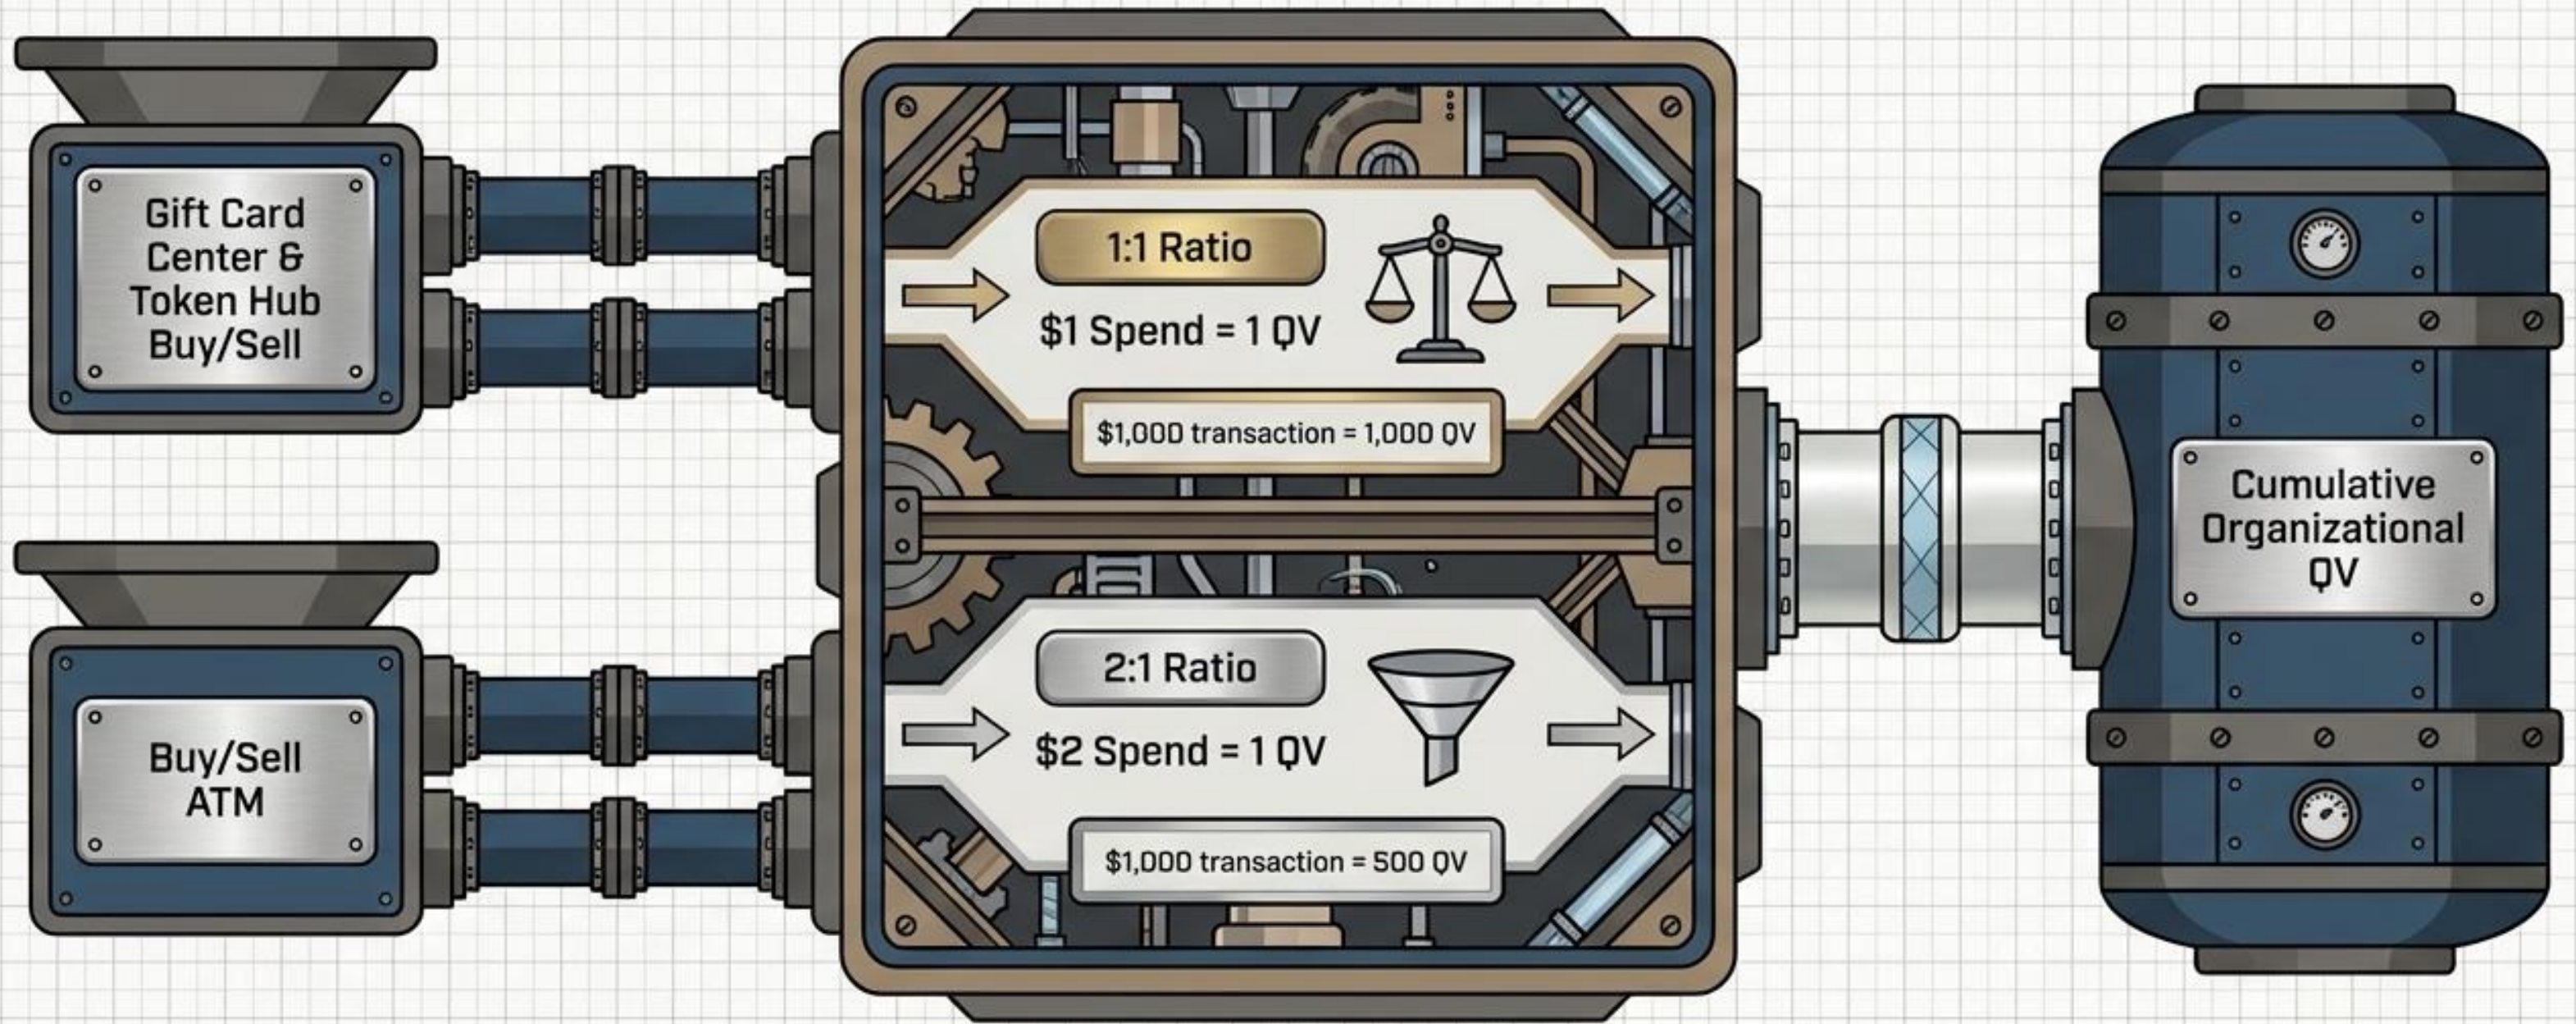

Definition:

The cumulative, qualifying volume generated by your entire organization used to trigger rank advancement.

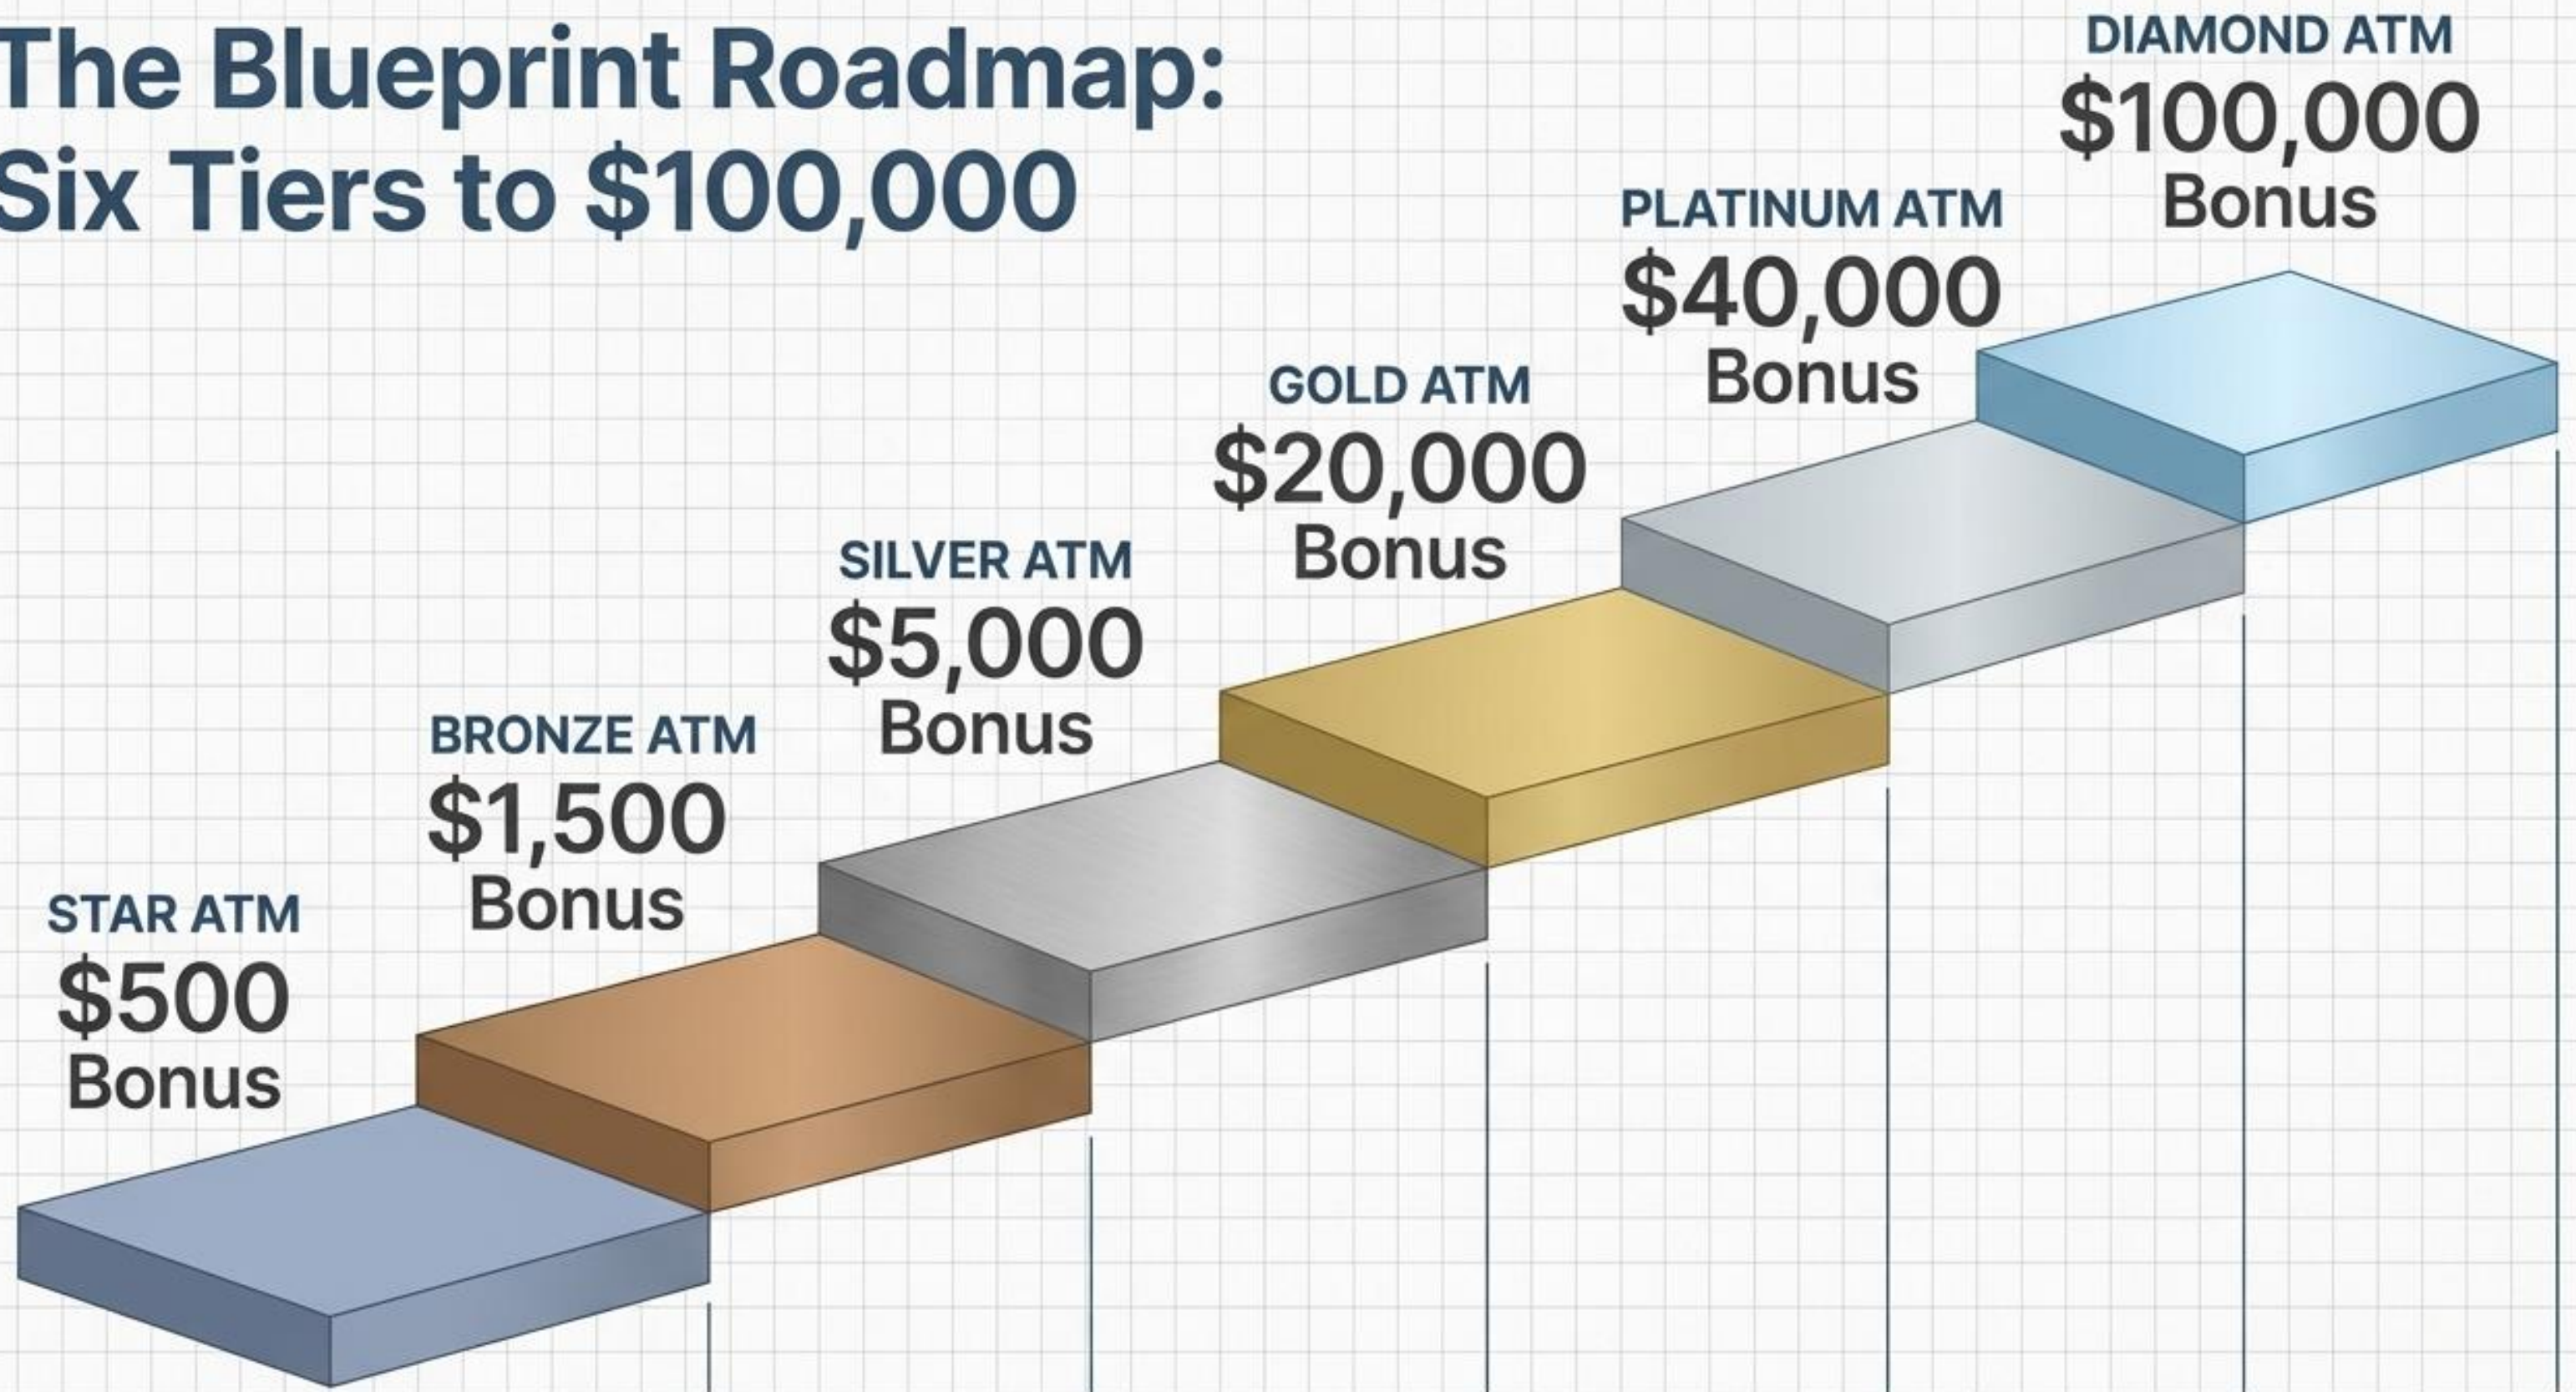

Sources:

Ecosystem transactions (Gift Cards, ATM, Token Hub).

The Ecosystem Conversion Engine

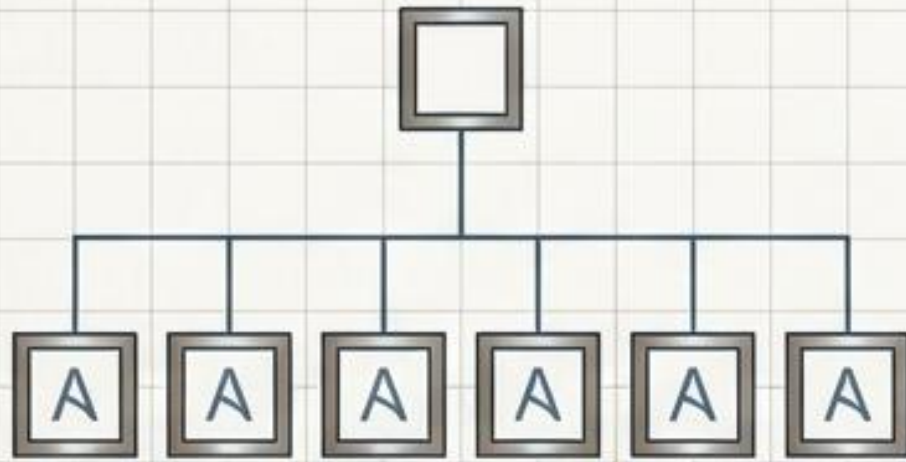

The Blueprint Roadmap: Six Tiers to \$100,000

STAR ATM Blueprint

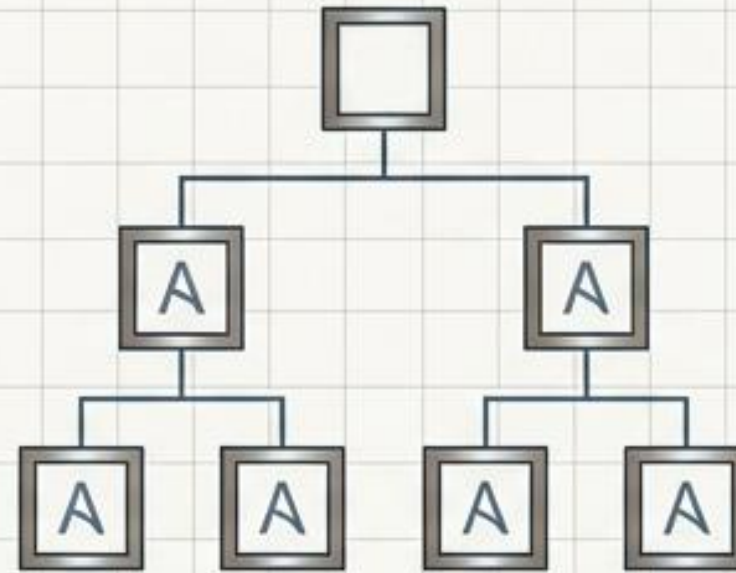

\$500 Reward

The Direct Builder

Structure: 6 Direct F1s (Agent Rank)

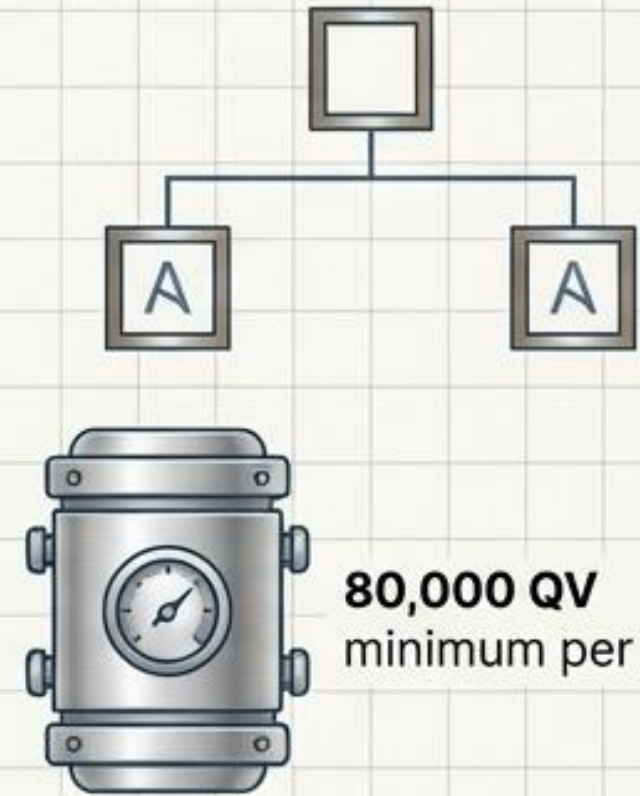

Advantage: PV is not required.

30,000 QV
minimum per leg

The Duplicator

Structure: 2 Direct F1s (Agent).
At least 2 sponsor 1 Agent F1 each.

80,000 QV
minimum per leg

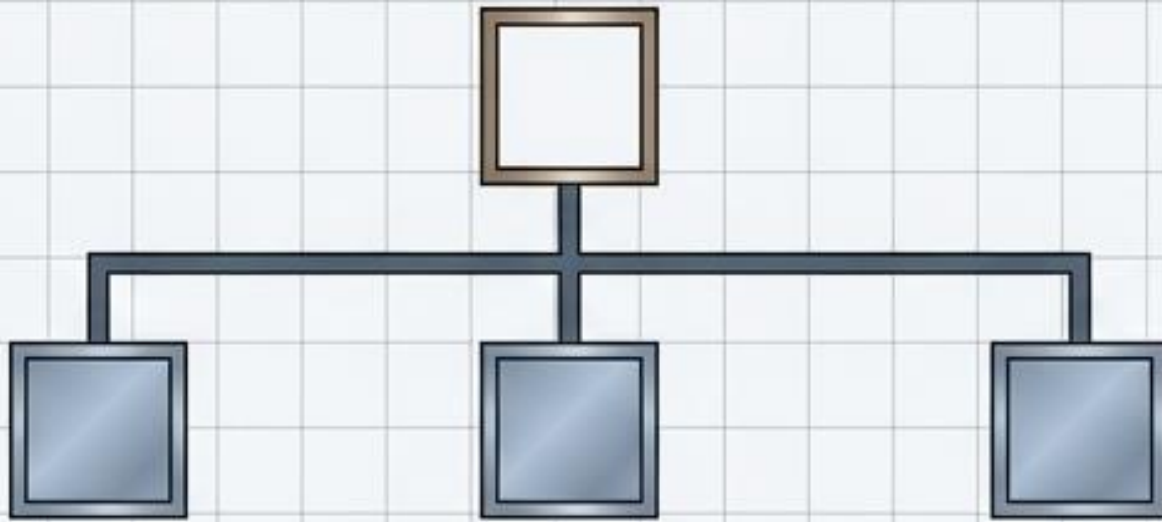

The Volume Driver

Structure: 2 Direct F1s (Agent).

BRONZE ATM Blueprint

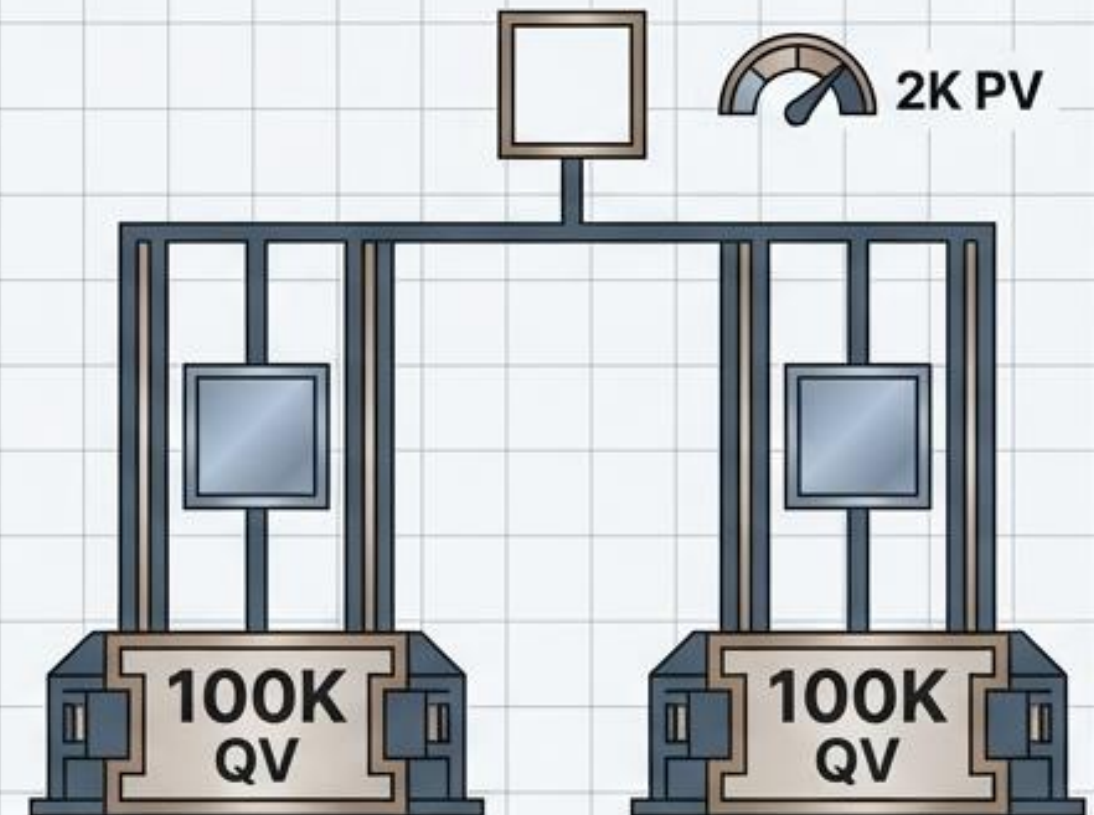

\$1,500 Reward

Path A: The Direct Leader Strategy

- **Requirement:** 3 Direct F1s who reach Star ATM.
- **Rule:** PV Exemption applies (PV not required).

Path B: The Balanced Volume Strategy

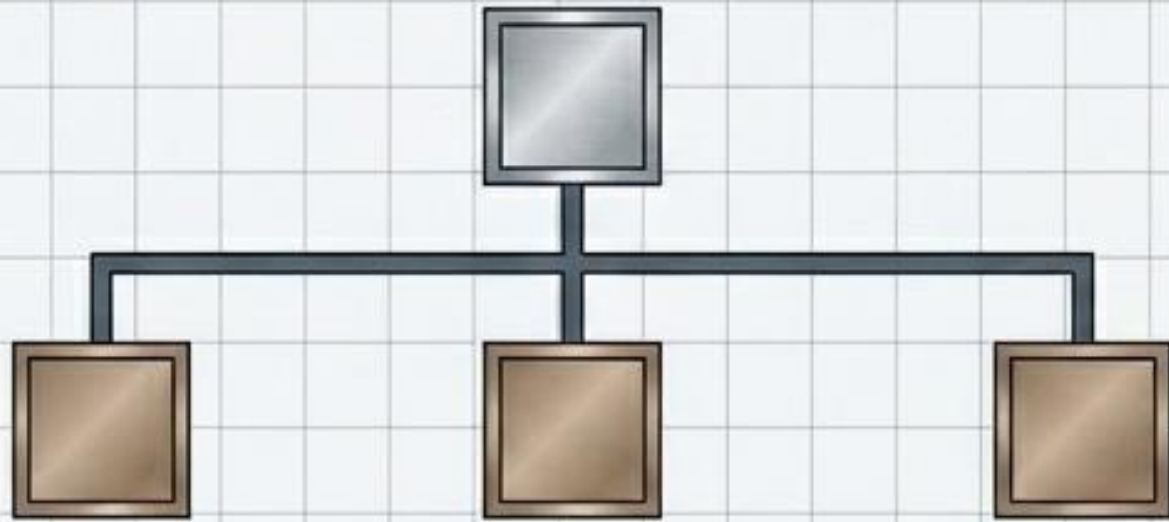

- **Architecture:** 2 distinct F1s legs.
- **Leadership:** Minimum 1 Star ATM (or higher) in each leg.
- **Volume Requirement:** 100,000 QV minimum per leg.
- **Maintenance:** 2,000 PV required per month.

SILVER ATM Blueprint

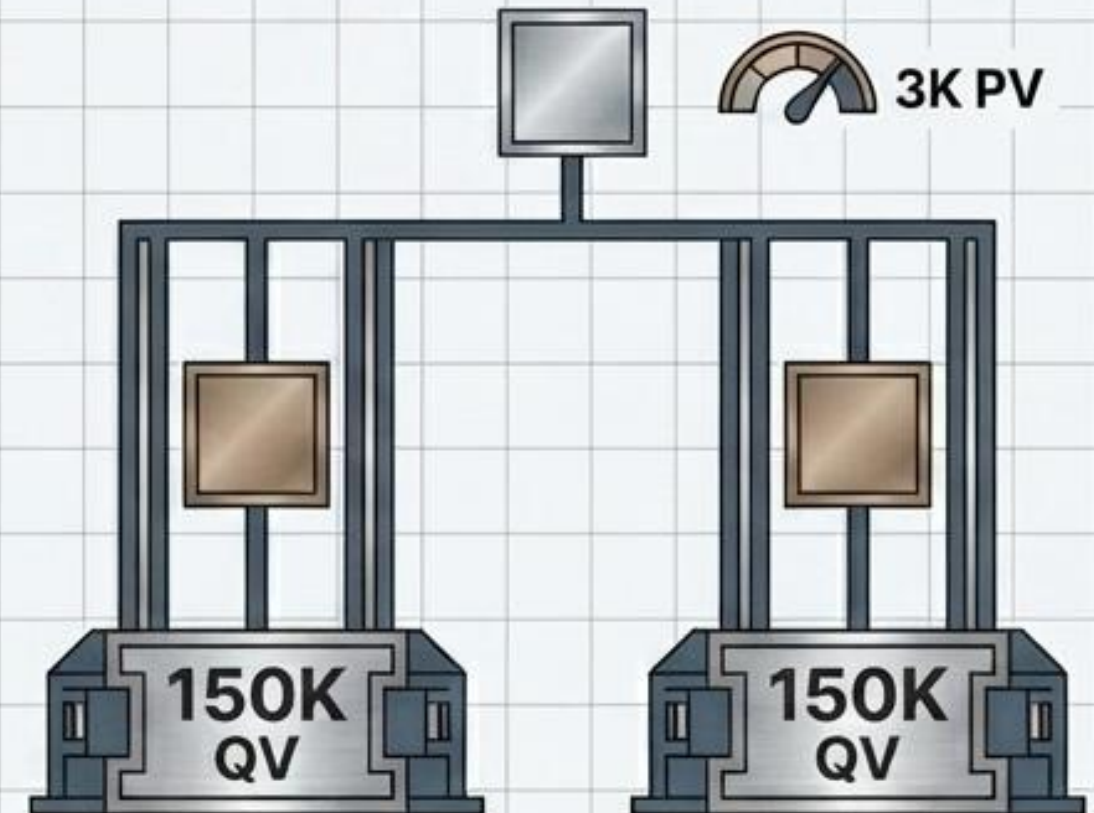

\$5,000 Reward

Path A: The Direct Leader Strategy

- **Requirement:** 3 Direct F1s who reach Bronze ATM.
- **Rule:** PV Exemption applies.

Path B: The Balanced Volume Strategy

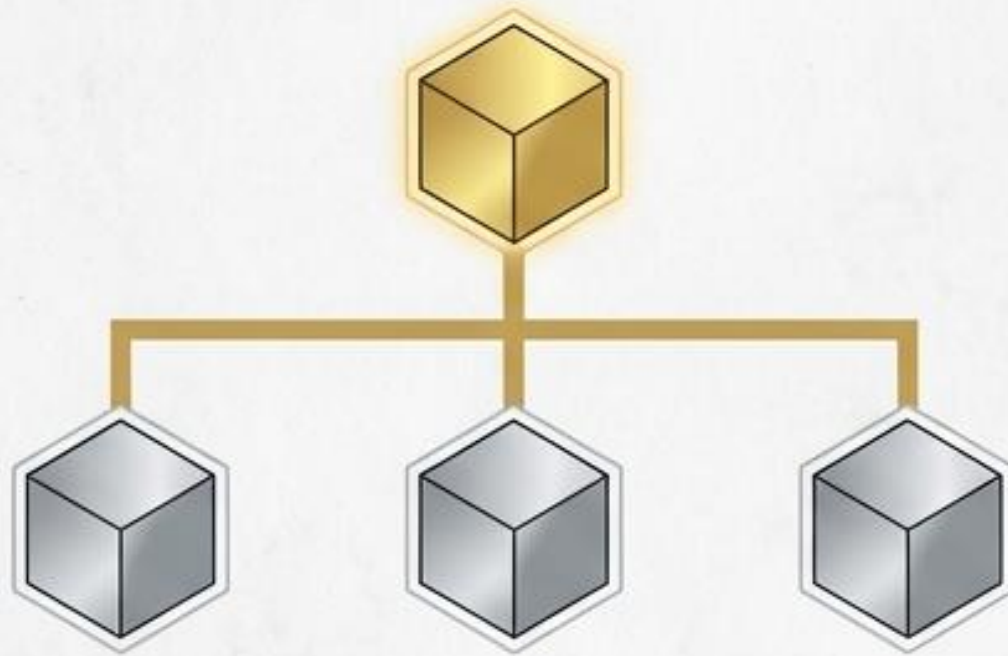

- **Architecture:** 2 distinct F1 legs.
- **Leadership:** Minimum 1 Bronze ATM (or higher) in each leg.
- **Volume Requirement:** 150,000 QV minimum per leg.
- **Maintenance:** 3,000 PV required per month.

GOLD ATM Blueprint

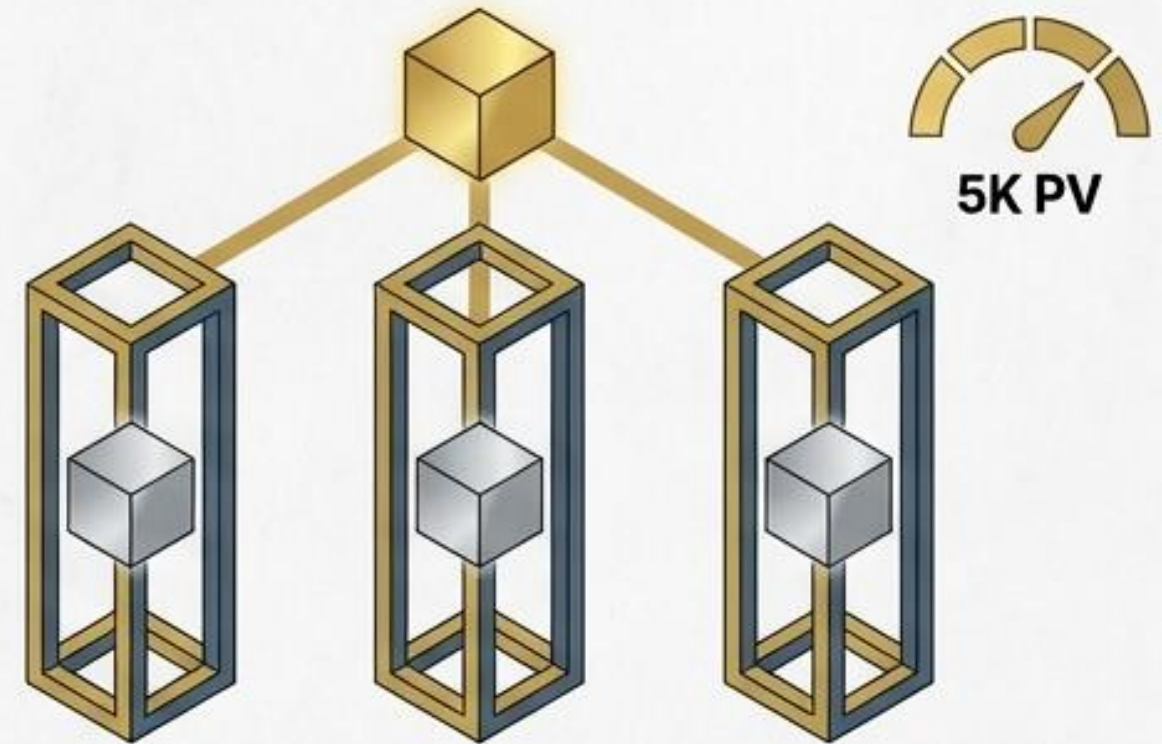

\$20,000 Reward

Path A: The Direct Leader Strategy

Requirement: 3 Direct F1s who reach Silver ATM.
Rule: PV Exemption applies.

Path B: The Balanced Volume Strategy

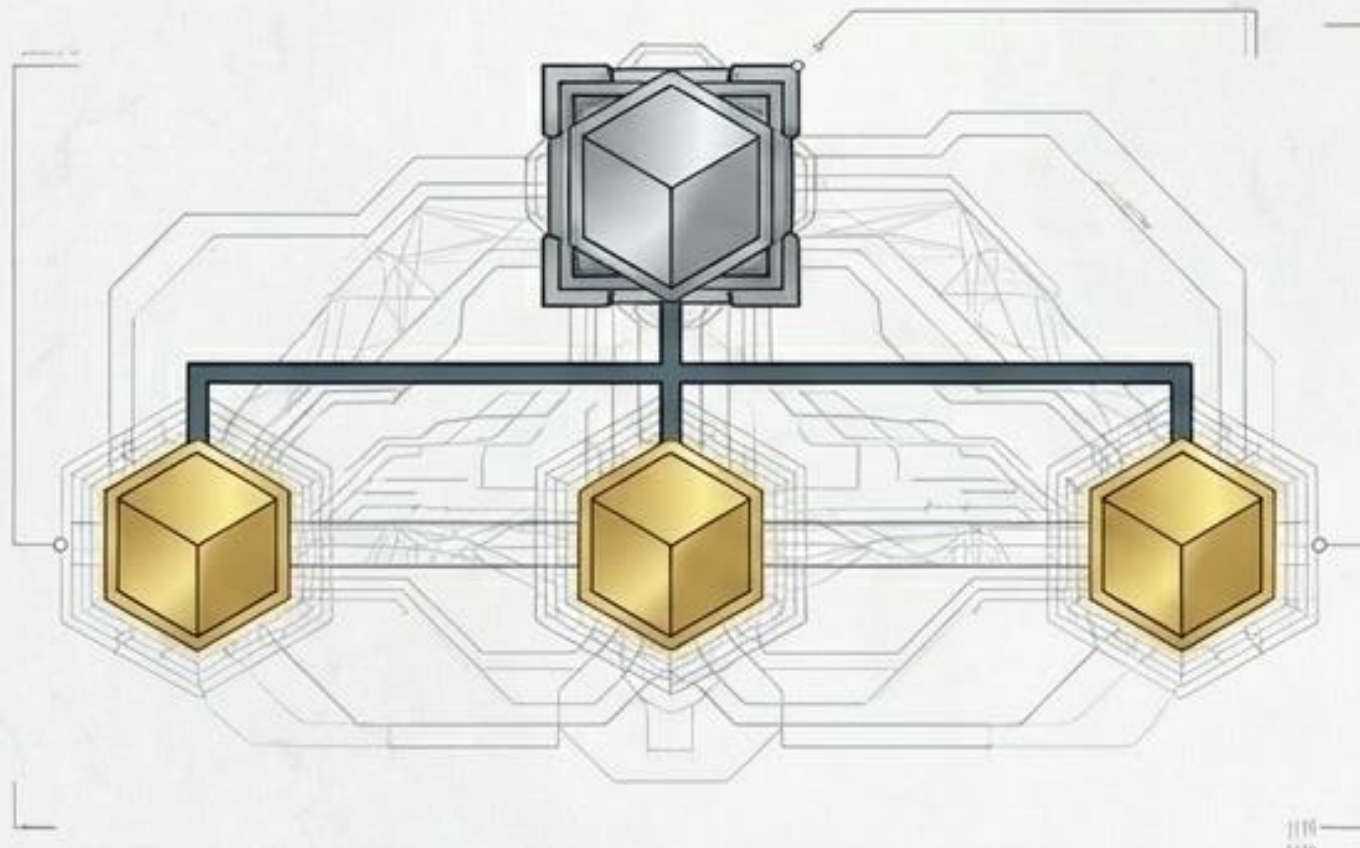

Architecture: 3 distinct F1 legs.
Leadership: Minimum 1 Silver ATM (or higher) in each leg.
Volume Requirement: Required minimum QV per leg.*
Maintenance: 5,000 PV required per month.

***Official Verification Note:** The original policy document lists "300,00 QV" for Gold ATM. Participants are advised to verify the exact threshold (likely 300,000) with official channels prior to structural planning.

PLATINUM ATM Blueprint

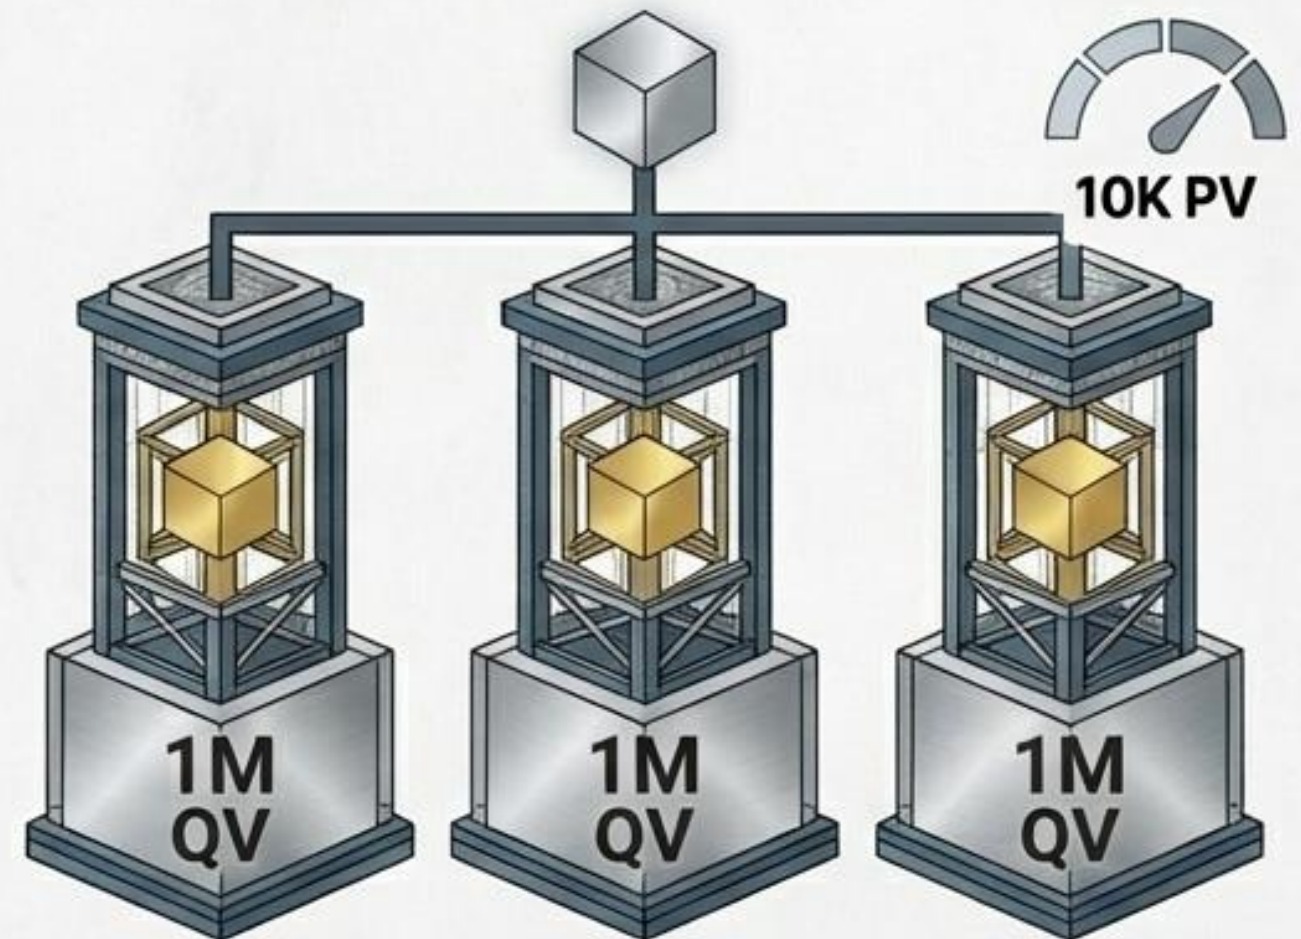

\$40,000 Reward

Path A: The Direct Leader Strategy

- **Requirement:** 3 Direct F1s who reach Gold ATM.
- **Rule:** PV Exemption applies.

Path B: The Balanced Volume Strategy

- **Architecture:** 3 distinct F1 legs.
- **Leadership:** Minimum 1 Gold ATM (or higher) in each leg.
- **Volume Requirement:** 1,000,000 QV minimum per leg.
- **Maintenance:** 10,000 PV required per month.

DIAMOND ATM Blueprint

\$100,000 Reward

Path A: The Direct Leader Strategy

Requirement: 3 Direct F1s who reach Platinum ATM.

Rule: PV Exemption applies.

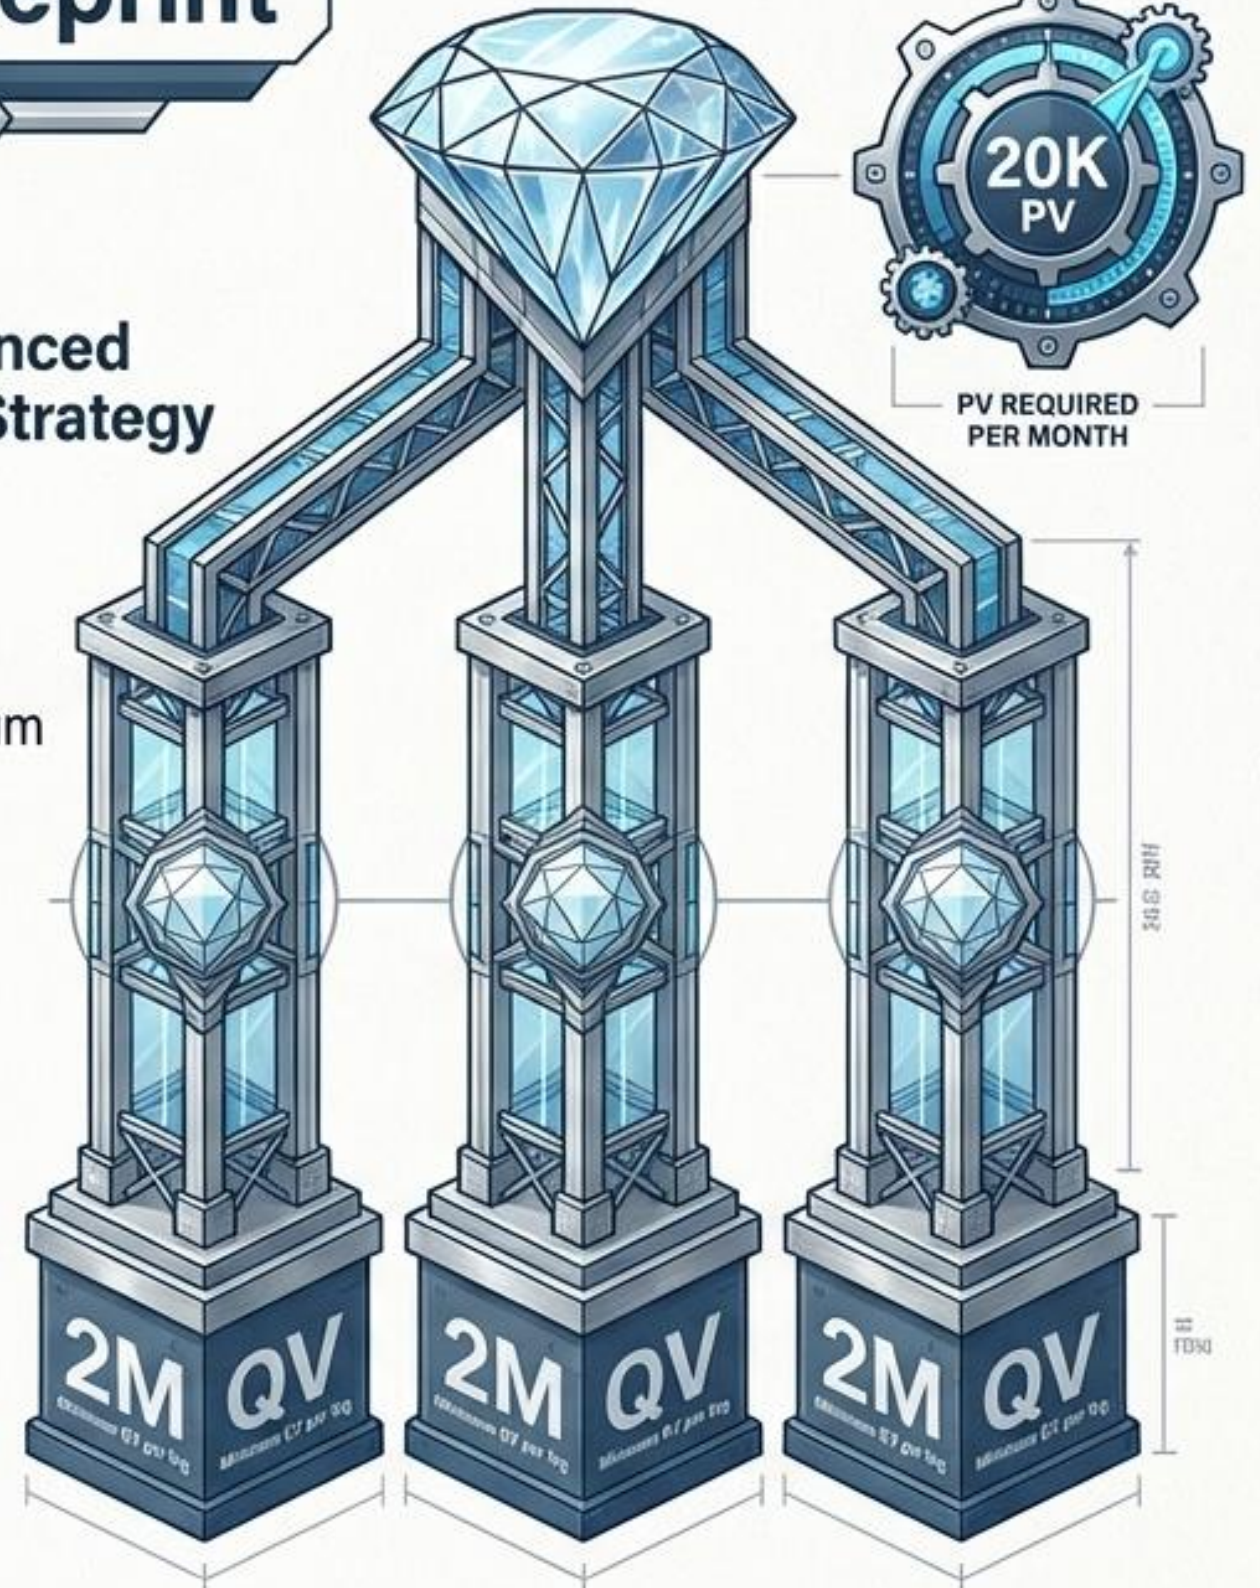

Path B: The Balanced Volume Strategy

Architecture:
3 distinct F1 legs.

Leadership: Minimum
1 Platinum ATM (or
higher) in each leg.

**Volume
Requirement:**
2,000,000 QV
minimum per leg.

Maintenance:
20,000 PV
required per
month.

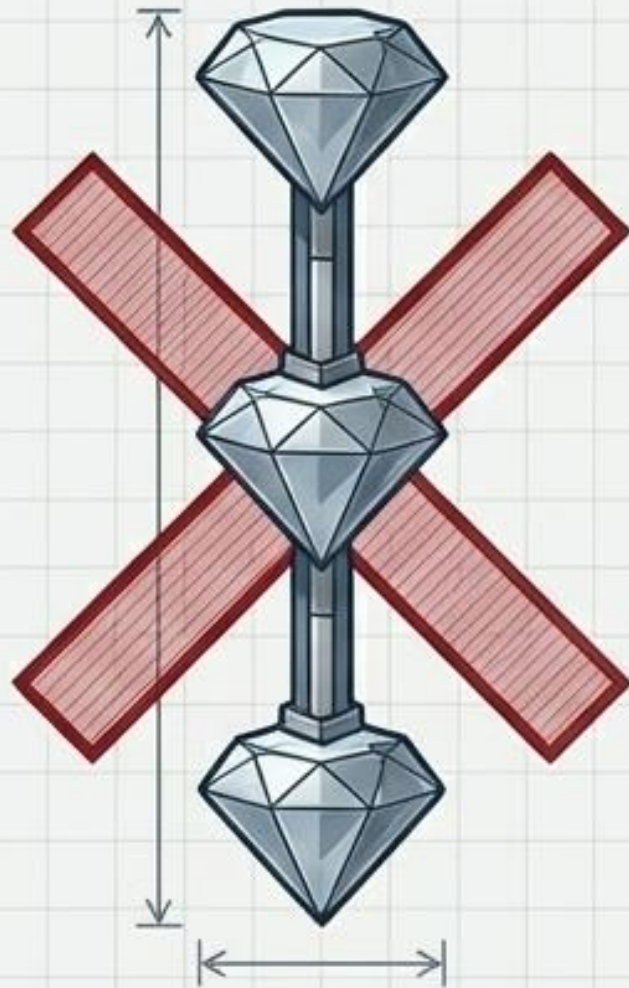

The Master Diagnostic Matrix

Rank	Reward	Path A (Direct Requirement)	Path B (Leg & Volume Requirement)	Monthly PV
 Star	\$500	6 Direct Agents	2 Legs (30k QV) or 2 Legs (80k QV)	N/A
 Bronze	\$1,500	3 Direct Stars	2 Legs + 100k QV	2,000 PV
 Silver	\$5,000	3 Direct Bronzes	2 Legs + 150k QV	3,000 PV
 Gold	\$20,000	3 Direct Silvers	3 Legs + Required QV	5,000 PV
 Platinum	\$40,000	3 Direct Golds	3 Legs + 1M QV	10,000 PV
 Diamond	\$100,000	3 Direct Platins	3 Legs + 2M QV	20,000 PV

Architectural Integrity: Anatomy of a Valid Leg

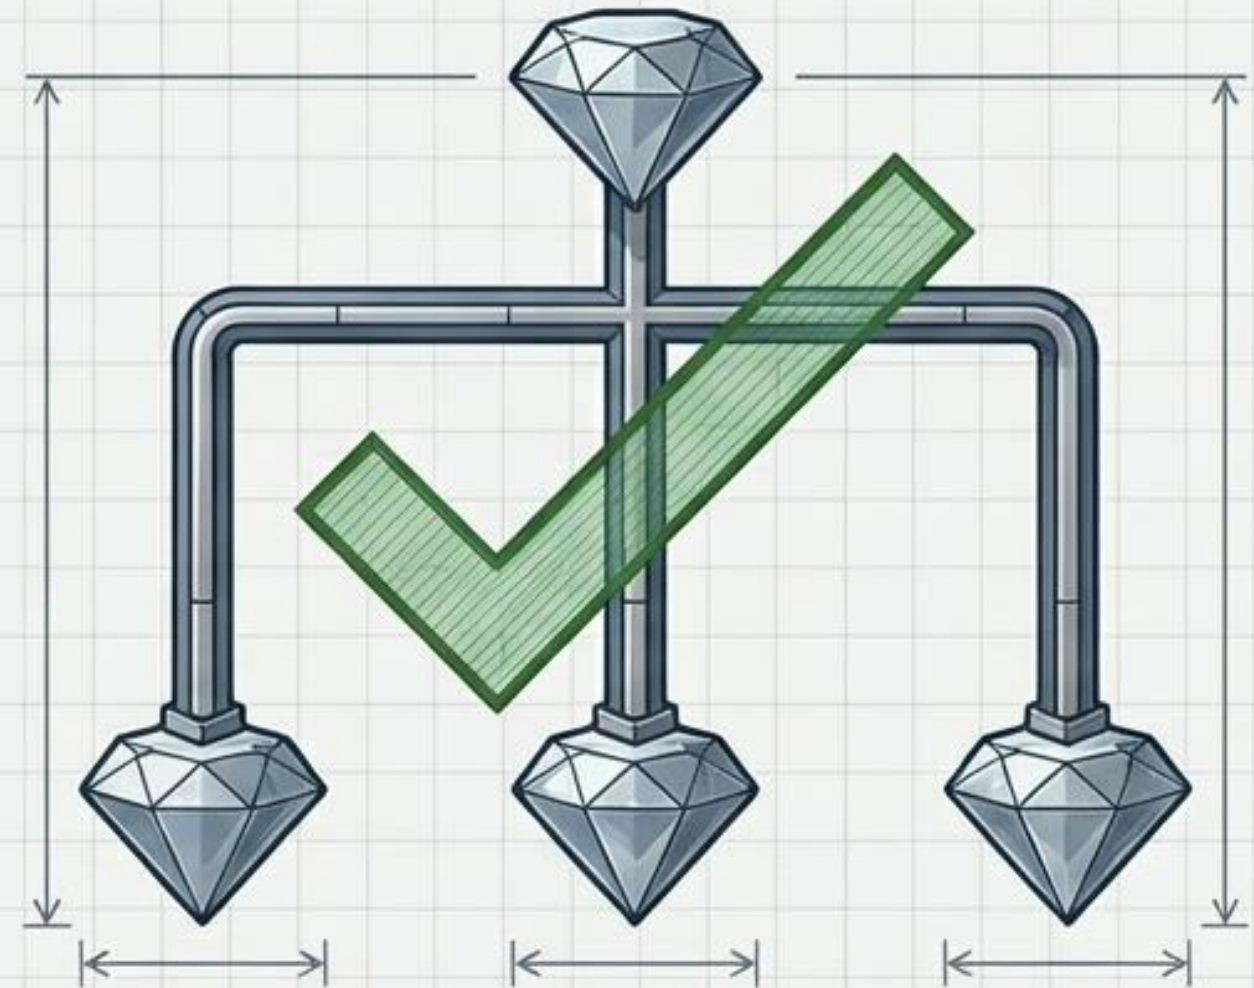

The Rule of Distinction: "Different legs" requires that qualifying leaders appear in separate, distinct F1 branches.

Invalid Structure

Stacking multiple leaders within a single leg only qualifies as one leg toward rank advancement.

Valid Structure

Leaders developed across parallel branches create independent, qualifying legs.

The Strategic Shift: Adapting Your Build

Synthesis Insight: The higher the rank, the more qualification depends on multiple independent legs and high organizational volume rather than solely direct sponsorship.

Blueprint Checklist & Operational Directives

Directive 1: The PV Exemption Rule

'PV not required' means Personal Volume is bypassed entirely if you execute the Direct Leader Path (Path A).

Directive 2: Structural Independence

Your required leaders cannot be stacked. They must anchor distinct, separate F1 legs to trigger promotion logic.

Directive 3: Volume Verification

Track your Ecosystem Conversion Engine closely. Remember that ATM volume generates QV at a 2:1 ratio, while Gift Cards and Token Hubs drive QV at 1:1.
