

VLINKPAY

IOU PROGRAM

Simple Member Explanation • Debt Sell Model

**Member owns VMM
and sells debt to VLINKPAY**

Maximum program allocation

3X

standard schedule: 42 months

1. What is IOU?

IOU is a Debt Sell program: members sell debt to VLINKPAY using VMM Token.

1

Member owns VMM Token

VMM is used inside the ecosystem and can be used to create an IOU Debt Sell package.

2

Sell debt to VLINKPAY

After confirmation, the system records the IOU package under the program policy.

Simple version

“Own VMM → choose an IOU package → sell debt to VLINKPAY → receive USDV allocations over time.”

Not investment • Not interest • Not guaranteed profit

2. IOU Participation Flow

VLINKPAY

A simple 4-step process for members.

All fees and expected received amounts must be displayed before the member confirms.

3. IOU Package Examples

Maximum program allocation is 3X the package value.

IOU Package	Maximum Allocation	Standard Schedule
\$1,000	\$3,000	42 months
\$5,000	\$15,000	42 months
\$10,000	\$30,000	42 months

Example: A \$1,000 package is recorded with a maximum program allocation of \$3,000.

4. Fees Members Should Understand

The system should clearly display all fees before confirmation.

USD → USDV / USDT

Conversion Fee

5%

Buy VMM

Slippage

3%

Buy VMM

Platform Fee

3%

With Franchise License

Platform Discount

-3%

Network fees may vary by coin, blockchain, and network conditions at the time of transaction.

5. VMM Purchase Fee Example

VLINKPAY

Franchise License discounts the 3% Platform Fee.

Without Franchise

Slippage 3%
+ Platform Fee 3%
= 6% before Network Fee

With Franchise License

Slippage 3%
+ Platform Fee 0%
= 3% before Network Fee

6. Standard Schedule vs. Faster Completion

Qualified network activity may help complete the 300% cap sooner.

Daily + Direct IOU + Binary + 5-Level Leadership Matching = Maximum Total 300%

7. Four Allocation Types Count Toward IOU

All allocations are accumulated into the maximum 300% cap.

1

Daily Distribution

Standard daily allocation schedule.

3

Binary

Recorded through qualified team structure activity.

MAXIMUM TOTAL: 300%

2

Direct IOU

Recorded when direct referrals generate valid IOU packages.

4

5-Level Leadership Matching

Matching based on rank and policy conditions.

8. Why VLINKPAY Operates This IOU Program

VLINKPAY holds VMM long term because it sees ecosystem utility for VMM.

Important: VLINKPAY does not promise that VMM price will increase. This explains the program operating model, not a price guarantee.

10. Where does the money come from to operate the IOU program?

VLINKPAY buys debt and holds VMM long term because it sees utility value for VMM in the company ecosystem.

Operating support comes from the long-term VMM holding strategy and demand for VMM utility in the ecosystem.

Ecosystem examples: Payment Gateway, P2P, Gift Card, Merchant/Mobile ATM, AI Services.

No promise that VMM price will increase; this explains the IOU program operating model.
