

VLinkPay WooCommerce Payment Gateway Installation & Configuration Guide

Step 1: Install the Plugin on Your Website

- Log in to your WordPress admin dashboard ([/wp-admin](#)).
- In the left-hand menu, navigate to **Plugins** → Select **Add New Plugin**.
- At the top of the page, click the **Upload Plugin** button.
- Click **Choose File** and locate the [vlinkpay-gateway.zip](#) file that we provided.
- Click **Install Now**.
- Once the installation is complete, click **Activate Plugin**.

Step 2: Configure Your VLinkPay Connection

After successful activation, you need to connect the plugin to your VLinkPay Merchant account to start receiving payments.

- In your WordPress admin dashboard, go to: **WooCommerce** → **Settings**.
- Switch to the **Payments** tab.
- Find the payment gateway named **VLinkPay Gateway**.
- Toggle the switch to blue to **Enable** the payment gateway, then click the **Manage** or **Finish set up** button next to it to access the configuration page.
- Fill in the following technical configuration details:
 - **Title:** The name of the payment method displayed on the checkout page (e.g., *Secure Payment via VLinkPay*).
 - **Description:** Instructions shown to customers when they select this payment method.
 - **Merchant ID:** Enter the Merchant Identifier provided to you by VLinkPay.
 - **Client ID:** Enter your Client ID provided by VLinkPay.
 - **Secret Key:** Enter the Secret Key provided by VLinkPay.
- Click **Save Changes** at the bottom of the page to complete the setup.
