

VLINKPAY LLC

IOU DEBT SELL PROGRAM TERMS AND CONDITIONS

Company	VLINKPAY LLC
Program	IOU Debt Sell Program
Effective Date	May 01, 2026

1. Program Overview

The IOU Debt Sell Program is a voluntary program offered by VLINKPAY LLC ("Company", "VLINKPAY", "we", "us", or "our") that allows eligible members who hold VMM Token to sell a qualifying debt position to VLINKPAY under an IOU package selected by the member and accepted by the Company.

Under the standard program schedule, a qualified IOU package may be allocated up to a maximum total of three hundred percent (300%) of the original package value over forty-two (42) months, subject to these Terms, system rules, compliance review, and the member remaining in good standing.

2. Definitions

Term	Meaning
VMM Token	A utility token used within the VLINKPAY ecosystem for eligible services, fees, and permitted internal program functions.
USDV Credit Point	An internal VLINKPAY ecosystem credit point used for system accounting and program allocation. USDV is not legal tender and has no guaranteed value outside the VLINKPAY ecosystem.
IOU Package	A selected Debt Sell package accepted by VLINKPAY and recorded in the system.
Debt Sell	The member transaction in which eligible VMM is sold or transferred to VLINKPAY in exchange for the Company recording an IOU package and allocating distributions according to program rules.
Maximum Program Cap	The total maximum program allocation of 300% of the original IOU package value, inclusive of Daily Distribution, Direct IOU, Binary, and 5-Level Leadership Matching.

Good Standing	The member has complied with these Terms, passed required compliance checks, and has not engaged in prohibited or fraudulent conduct.
----------------------	---

3. Eligibility and Account Requirements

- Members must create a VLINKPAY account and provide accurate personal or business information.
- Members must complete required KYC or KYB verification before accessing program features where required.
- VLINKPAY may reject, suspend, or limit participation based on compliance, risk, geographic restrictions, sanctions screening, suspicious activity, or applicable law.
- Participation is not available where prohibited by law or where VLINKPAY does not support the service.

4. Debt Sell Transaction

A member may choose to use eligible VMM Token to participate in a Debt Sell transaction. Once the transaction is confirmed and accepted by VLINKPAY, the system records the IOU package value and the member becomes eligible for program allocations under these Terms.

All transactions are final after confirmation, except where VLINKPAY determines that a transaction must be reversed, adjusted, frozen, cancelled, or reported due to error, fraud, chargeback, prohibited activity, legal requirement, or compliance concern.

5. IOU Package Value and Maximum Program Cap

The maximum total allocation for an IOU package is 300% of the original package value. Example: a \$1,000 package has a maximum total allocation of \$3,000. The 300% cap includes all program allocation sources combined and is not payable multiple times.

6. Distribution Sources and 300% Maximum Limit

The following four allocation sources may count toward the same 300% maximum program cap:

- Daily Distribution according to the standard schedule.
- Direct IOU allocation when a qualified direct referral or direct IOU activity meets program rules.
- Binary allocation when eligible binary team volume or structure qualifies under the compensation plan.
- 5-Level Leadership Matching when the member meets rank, qualification, and policy requirements.

Important: these four sources do not create four separate 300% payments. They are combined into one running total. Once the total allocation reaches 300% of the original IOU package value, the package is considered completed and no further allocations are owed for that package.

7. Timing of Distributions

The standard schedule is forty-two (42) months. A member who does not develop network activity may receive allocations according to the standard Daily Distribution schedule, subject to system and compliance rules.

A member who develops eligible network activity may complete the 300% maximum cap earlier than 42 months through Direct IOU, Binary, and Leadership Matching allocations. Network activity cannot increase the maximum cap beyond 300%.

8. VMM Utility and Company Holding Strategy

VLINKPAY offers the IOU Debt Sell Program because the Company believes VMM Token may have long-term utility within the VLINKPAY ecosystem. Many ecosystem services may require or support VMM for payment of service fees, platform fees, processing fees, or other permitted ecosystem functions.

The Company may hold VMM long term as part of its business strategy. This explanation is not a promise that VMM will increase in price or value, and it is not an earnings claim, investment representation, or market forecast.

9. Fees and Conversion Charges

Fees are disclosed before the member confirms each transaction. Current program-related fees may include:

Fee / Charge	Standard Rate	Notes
VMM buy slippage	3%	Applied to address price movement or execution variance.
Platform fee	3%	May be discounted to 0% for an active Franchise License holder.
Network fee	Variable	Depends on asset, blockchain network, system route, and network conditions.

VLINKPAY may update fees, discounts, or supported assets. The system confirmation screen controls the final fee disclosure for each transaction.

10. No Investment, No Interest, No Profit Guarantee

The IOU Debt Sell Program is not offered as an investment, securities offering, profit-sharing plan, interest-bearing account, bank deposit, savings account, or insured financial product. VLINKPAY does not promise profit, market appreciation, passive income, fixed investment return, or guaranteed price increase of VMM.

Any program allocation is a contractual program allocation subject to these Terms and the 300% maximum cap. Members should not participate based on an expectation of profits from the efforts of others or based on third-party statements not authorized by VLINKPAY.

11. USDV Credit Points

USDV Credit Points are used for internal system accounting. USDV Credit Points may be redeemable, usable, convertible, or transferable only as permitted by VLINKPAY policy and applicable law. USDV Credit Points are not legal tender, not a bank deposit, not FDIC-insured, and not guaranteed to have value outside the VLINKPAY ecosystem.

12. KYC/KYB, AML, Sanctions, and Compliance

- VLINKPAY may require identity verification, business verification, source-of-funds review, sanctions screening, transaction monitoring, and ongoing due diligence.
- VLINKPAY may file reports, maintain records, freeze or reject transactions, and cooperate with regulators or law enforcement as required by law.
- Members may not use the program for illegal activity, money laundering, sanctions evasion, fraud, market manipulation, tax evasion, or prohibited jurisdictions.

13. Taxes and Reporting

Members are responsible for determining and paying all taxes related to digital assets, VMM transactions, USDV Credit Points, USDT, conversions, distributions, rewards, fees, and any other program activity. VLINKPAY may issue tax forms, including Form 1099 or other applicable reports, when required by law.

Members should consult their own tax professional. VLINKPAY does not provide tax, legal, accounting, or investment advice.

14. Member Representations

- The member has read and understands these Terms.
- The member is participating voluntarily and using funds or assets that the member lawfully owns or controls.
- The member understands that the program has risks and no guaranteed market outcome.
- The member will not make unauthorized earnings claims or misrepresent the program to others.
- The member will keep login credentials secure and immediately report unauthorized access.

15. Program Changes, Suspension, and Termination

VLINKPAY may modify, suspend, limit, discontinue, or terminate the program or any feature at any time to address legal, compliance, security, market, liquidity, operational, technical, or business requirements. Changes may apply prospectively unless an immediate change is required by law, regulator request, fraud prevention, security, or risk management.

16. Risk Disclosures

- Digital asset values may fluctuate and may lose value.
- Network fees, congestion, delays, slippage, and execution variance may occur.
- Eligibility, fees, supported assets, and program availability may change.
- Regulatory treatment of digital assets, tokens, rewards, credits, and compensation programs may change.
- System downtime, cyber events, transaction errors, and third-party provider failures may occur.

17. Records, Statements, and Confirmation

The VLINKPAY system will maintain transaction records, package status, fee disclosures, allocation history, and cap progress. Members must review confirmations and statements promptly and report any suspected error within thirty (30) days unless applicable law requires a longer period.

18. Prohibited Conduct

- Creating fake accounts, duplicate accounts, or nominee accounts.
- Using false identity, false business information, or misleading documents.
- Manipulating network volume, binary structure, referrals, or rank qualification.
- Making investment, guaranteed income, interest, profit, or ROI claims.
- Using VLINKPAY systems for unlawful conduct or prohibited jurisdictions.

19. Limitation of Liability

To the maximum extent permitted by law, VLINKPAY is not liable for indirect, incidental, special, consequential, exemplary, or punitive damages, lost profits, market losses, loss of token value, blockchain delays, third-party provider failures, or losses caused by member error, unauthorized access, or prohibited conduct.

20. Dispute Resolution and Governing Law

These Terms are governed by the laws of the State of Texas and applicable federal law, without regard to conflict-of-law rules, unless mandatory consumer protection law requires otherwise. Any dispute resolution, arbitration, class action waiver, venue, and notice provisions should be finalized by VLINKPAY legal counsel before publication.

21. Electronic Consent and Acceptance

By clicking "I Agree," signing electronically, or participating in the IOU Debt Sell Program, the member acknowledges that the member has read, understood, and agreed to these Terms, the VLINKPAY Terms of Use, Privacy Policy, AML/KYC Policy, fee schedule, compensation plan, and any program rules displayed in the app or website.
